

**FIVE POINTS
TRADING CORP.**

About us

Five Points Trading is an international company dedicated to the manufacture, design and export of Latin American ethnic foods. All our products are under strict planting standards with the use of soil improvers and organic fertilizers to offer the best quality to the commercial chains operating in the different geographical areas of Latin markets in the United States, using the highest standards of quality and safety.

We specialize in the development, industrial processes and export of traditional Salvadoran food that is distinguished by its originality, authentic taste, variety and excellent quality. One of our main goals is to preserve the style and flavor of "home-made" foods, so we strive to produce nutritious and quality foods using unique inputs and procedures.

We manufacture, label and pack our products requested by our wholesale distributors, including in the packaging the nutritional tables and printed requirements required by each product according to international food labeling and packaging regulations or to specific market requirements.

As an export food processing company, Five Points Trading Corp is duly registered with the US FDA. (Food and Drug Administration), and is also accredited by national and international agencies in quality systems and GMP (Good Manufacturing Practices) and HACCP (Hazard Analysis and Critical Control Points, for its acronym in English), which guarantee the quality and safety of the products, and therefore the satisfaction and loyalty of our consumers.

Always thinking about the satisfaction of our customers, we maintain the highest standards in all our processes and products throughout the supply chain and value, from the technical training and working conditions of our human resource, and the selection of materials raw materials and its treatment at our plant to export finished products to distributors and consumers.

Mission

To be a competitive leader in the production and export of one hundred percent Salvadoran food products manufactured under standardized production processes and strict quality and safety standards that meet the demand of the nostalgic ethnic American / Salvadoran and Latin American market in the USA. and in other regions of the world.

Vision

To consolidate ourselves in an innovative, competitive, producing and exporting company of ethnic, traditional foods and other specialties, keeping us at the technological forefront of business development that allows us to conquer with sustained success the market and other international markets.

Our Values

- **Honesty** We are a company identified with the principles of ethics, honesty and transparency.
- **Trust** We strive to fulfill what we offer and promise to be a credible company.
- **Responsibility** We carry out our activity with full dedication and discipline fulfilling as people and as company with our goals, demands and commitments.
- **Respect** We work with respect for the people, the policies of our company, the environment and the institutions, laws and trade agreements and treaties.
- **Solidarity** We work with the attitude of solidarity that allows us to project our development towards the needs of our human resource and our community.
- **Innovation** Our commitment to leadership keeps us in constant search for new ideas and proposals that add value to our products to differentiate them from the rest of the competition.
- **Success** We work with the goal of being leaders in the processed food industry so that success is the goal of our activity.

Our Focus

That our products will be recognized as free of toxic waste due to the pesticides and fertilizers used. Since our products are fertilized with organic soil improvers that decontaminate crops.

Production

Our production plant is designed, built and equipped especially for the development of frozen products, allowing the necessary optimization and permanent development of our processes and products.

After cooking processes to produce products or procedures for sorting, washing and sanitizing fresh vegetables, the food passes to suitable facilities to precool and freeze quickly.

The frozen items represent more than 95% of our production and are elaborated respecting principles and norms that guarantee the correct handling of the cold food preservation mechanism.

Production Line

We operate a linear production under rigorous standards of quality and safety in all our manufacturing processes, avoiding cross contamination and guaranteeing healthy and excellent quality food products.

In Five Points Trading the chain of cold in the products is a fundamental element so it never breaks in the handling of frozen products; in addition, we work hard to keep it until the product reaches the final consumer.

Our frozen products warehouses are integrated as part of the cold chain and receive products directly from the packaging process, ready to be dispatched to the containers parked in the heated loading station with precise and controlled temperatures guaranteeing the frozen transport process and the quality of the products.

Qualified Human Resources

We have highly experienced and trained technical and operational staff. Among other measures that guarantee the safe handling of food, the Ministry of Health and Social Assistance trains our human resource in the Hygienic Handling of Food, based on international standards of Good Manufacturing Practices.

Frozen Products

Time of Life: 365 days without losing cold chain and without opening the packaging.

Storage recommendations:
Keep the product in freezing temperatures (-17 ° C), free from contamination.

IQF Tamales

The tamales of Elote are one of the most popular and requested Latin American dishes so there are so many varieties and ways to prepare them. Our corn tamales are made with soft, fresh, soft-textured corn dough, steamed and wrapped in your tusa following procedures and recipes from our grandmothers that guarantee the true nostalgic flavor. These tamales can be either sweet or salted, white or yellow corn and even fillings

Time of Life: 365 days without losing cold chain and without opening the packaging.

Storage recommendations:

Keep the product in freezing temperatures (-17 ° C), free from contamination.

IQF Marañón or Cajú

(*Anacardium occidentale*)

The fruit consists of two parts: the pseudofruit and the walnut. The pseudofruit, called cashew apple, is the result of the development of the peduncle in a fleshy structure characteristic of this plant that develops and matures later to the walnut. It is noteworthy that the pseudofruit, whose crust is magenta or reddish at maturity and its pulp is orange yellow, has an extremely sour and astringent taste, and is also very juicy.
